High Bay Lights

General Purpose Lighting for:

- > Commercial buildings
- > Factory and production facilities
- > Gymnasiums
- > Hangars
- > Industrial facilities
- > Warehouses

High Bay Lighting

Designed as an energy-efficient alternative to metal halide lights and T-12 light fixtures, GFS' High Bay Light Fixtures can be used in a variety of industrial and general purpose settings. Common applications include commercial buildings, gymnasiums, industrial facilities and warehouses.

Design Benefits

- Made with quality materials and expert craftsmanship in the USA
- ETL listed
- May qualify for utility rebates (programs throughout the USA)
- Feature a highly reflective aluminum reflector
- Lumen maintenance of over 96% (T8), 95% (T5) ensures proper light levels over life
- Mounting: V-clips and adjustable cable kit (sold separately)
- Wire guard available
- High bay sensor available

GFS Part Number:
LFG-1749-6-T8

GFS Part Number:
LFG-1749-6-T5

Fixture Accessories

- Power Cable: 6 ft & 10 ft lengths
- Adjustable cable kits: 5 ft, 10 ft & 15 ft lengths
- Reflectors: Standard "Wide" light distribution
Deep Well "Narrow" light distribution
- V-clips
- Wire guard 16.5" x 48": LFGA-WG1648
- Replacement tube/bulb: 230-281 (T8)
230-285 (T5)
